Education

BSc in Computer Science

PJATK, Gdańsk

October 2024 - Present (4th semester)

- Directing career path towards an Artificial Intelligence (AI) specialisation from the 5th semester

AI_devs4

Certificate obtained: April 2026

Applied Data Science with Python

University of Michigan

In progress (Expected completion: Spring 2026)

AWS Academy Cloud Foundations

In progress (Expected completion: Spring 2026)

Excel Skills for Business

Macquarie University, Sydney

Certificate obtained: January 2026

Portfolio

Dream Garage Hunter (Proprietary B2B Project)

January 2026 - Present

- Engineered and deployed a Python-based engine for real-time automotive market analytics.
- Developed an algorithm reducing the detection time of price bargains from several hours to mere seconds.
- Conducted MVP market validation with industry entrepreneurs.

Github Portfolio (github.com/lukandooo)

- Actively maintained portfolio featuring commercial prototypes, advanced academic projects, and independent automation scripts. Codebase developed with a rigorous emphasis on clean architecture and business logic optimisation.

A 4th-semester Computer Science student aiming to specialise in AI, combining software engineering with data analytics. Raised in a bilingual environment, ensuring native fluency in English technical and project communication. Possess commercial experience in building proprietary B2B tools and optimising business results. Effective in teamwork and public speaking. As an individual with strong entrepreneurial ambitions, I am seeking a summer internship to test my code against large-scale infrastructure and experience the standards of industry leaders from the inside.

Experience

Founder

Lavaro Digital (B2B Content Marketing Agency)

August 2024 - December 2025

- Drove over 15,000 downloads for the 'Smart Workout' mobile application through strategic ad campaign planning, continuous conversion rate analysis, and professional short-form video editing.
- Generated a record-breaking \$8,000 in single-day revenue for an e-commerce client by overseeing and optimising data-driven Meta Ads campaigns.
- Scaled the business and managed a two-person operational team (videographer, video editor).
- Actively acquired clients through networking at business events.

Customer Advisor

SK Store

February 2024 - April 2024

- Provided direct customer service and identified purchasing needs.
- Practically trained negotiation skills, interpersonal communication, and working under the pressure of sales targets.
- Maintained order: physically organised the warehouse, ensured cleanliness, and accurately counted stock levels.

Skills

Tech: Python, C/C++, Java, HTML, PHP, SQL, WordPress, Pandas, Web Scraping, SEO, API Integration, Git, Canva, DaVinci Resolve (Video Editing), CapCut (Video Editing).

Business & Soft Skills: Critical Thinking, Cross-Functional Teamwork, Public Speaking, Creative Problem Solving, Market Validation (MVP), Management.

Languages: English (Native - British Citizenship), Polish (Native).

Interests

Strength Training, Basketball, Automotive Enthusiast, Business, Video Editing, Geopolitics, Institutional Economics.

Analytical Reading - I manage a personal database where I analyze my reading habits and performance. I also use data-driven insights to prioritize and plan my future book acquisitions (wishlist).
